TNT Super Salmon+

Product Brief

What is Super Salmon+ - Super Salmon + is a blend of products all derived from salmon, including whole salmon. As a fish unmatched for its fat content, this product provides your crops with a unique energy boost—especially since most of those fats have been naturally fermented and converted to a soluble form that is rapidly absorbed and utilized by the plant and the microbes associated with its biosphere. It also contains kelp and chitin, both compounds that can help your plants cope with abiotic stresses.

Why use it, what are the benefits - Super Salmon + contains forms of nitrogen that are both readily available and require a further breakdown, resulting in a product that provides both immediate and more lasting effects. The presence of simple building blocks for the synthesis of more complex proteins, fats, and phytochemicals provides your crop with an energy efficient means to quickly assemble what it needs in order to rapidly improve its nutritional and immune status, helping to reduce insect and disease pressure and reduce YOUR stress level!

What are the technical Specs?

2-1-0 - Highly effective source of nitrogen and soluble fats that increase your crop's energy level quickly.

pH 3.5-4.0 - Due to the low pH, dilution is required

Filtered to 120 mesh- Filtered for ease of use and to reduce plugging

Suitable for Organic use - Contains approved ingredients. Check with your local certifier before using it.

Application rates

In trench/broadcast: up to 2 gal/acre (min 1:3 dilution)

Foliar/fertigation: up to 2 gal/acre (min 1:10 dilution)

OMRI LISTED For Organic Use

TNT Super Salmon + is a fortified salmon hydrolysate containing chitin, kelp, amino acids, volatile fatty acids, and natural fermentation organisms. It provides both short -term and mid-term nutrition for your crop while promoting a Boost of beneficial microbes for the continued support of your plants.
